Summary

Business-oriented software developer, working with teams to build product experiences that simplify complex processes. Combining software development, visual design, and business understanding to turn inefficient workflows into practical tools that help teams get more done. Looking to join a software team building products at scale.

Skills

JavaScript	PHP	Python	Java
React / Next.js	Angular	Node.js / NestJS	Spring Boot
FastAPI	WordPress	Odoo	PostgreSQL
Web scraping	CI/CD	Docker	Testing Practices
Figma	Framer	Interactive design	Prototyping
Claude Code / Codex	LLM Integration	Obsidian	Agent Tooling

Experience

Jul 2026 – Present

Technical consulting

Software Developer

- Tarifpublic.fr, provide technical consulting for a French state-supported marketplace for public procurement, supporting standardized product pricing.
- LingoWP, maintain and support a multilingual WordPress plugin deployed across four digital agencies.

Jul 2025 – Present

Phoenix AI USA Inc. - Hypeo, MENA

Software Developer

Developed product features for Hypeo, a MENA creator-marketing SaaS platform connecting influencers and media creators with businesses launching online content campaigns.

- Delivered a contextual AI chat that transforms open-ended client conversations into configured marketing campaigns, integrated with the internal influencer database.
- Built and refined the front-end experience in close collaboration with a senior technical lead, continuously adapting workflows to backend integration and evolving business requirements.
- Automated the manipulation and extraction of influencer data from web-scraping outputs and database pipelines used across the platform.

Experience

- Took ownership of maintenance, deployment support, access/IP handover, and bug-fix coordination during a technical leadership transition.
- Documented core business modules, missing implementation areas, and architectural solutions to support future development planning.
- Developed an external data-metrics solution for creator audience and professional collaboration insights, later accepted and integrated into the company workflow.

Nov 2024 – Jun 2025

Cogy Tech, Morocco

Software Developer

Co-developed and rolled out a standardized software delivery process, aligning team workflows and contributing to lower shipping costs.

- Established a reusable prototyping approach to validate business requirements across multiple use cases before development.
- Tracked sprint KPIs in Odoo and surfaced bottlenecks to improve planning accuracy and throughput.
- Brought 02Book to production, an AI-powered writing assistant for B2B writers, used by clients such as Orange and Le Matin.
- Strengthened software design skills under continuous mentorship, working on client requirements and delivery constraints.

Nov 2024 – Jan 2025

Rich Media, Morocco

Software Developer

Designed and integrated product features for Inflauditor, a business decision-making dashboard that helps brands analyze large-scale creator data for campaign planning.

- Designed UI flows and prototypes for Inflauditor to validate product direction and accelerate development decisions.
- Integrated data insights such as creator scoring, language detection, and sentiment indicators to support campaign planning.

Jun 2024 – Oct 2024

Digital Consulting

Software Developer

Delivered high-conversion lead-capture landing pages for Miratti (Morocco), French Dandy (Dubai), and Horde Studio (USA), supporting growth campaigns showcased at regional events (e.g., Forbes Middle East).

Apr 2023 – Jul 2024

Cyber Cohesion, Singapore

Software Developer

Led web development of a CTF platform for security competitions, used in global events such as OWASP AppSec Days, BSides Singapore, and ISACA.

- Implemented a Go API service to orchestrate isolated application deployments, providing a secure training environment for participants.

Experience

- Developed the web experience of Warzone, a dashboard to track team progress, scoring and overall competition gamification.

Apr 2023 – Jul 2024 **Sodiadd, France**
Software Developer

Developed a responsive subscription website for individual real estate investment plans.

Jun 2022 – Jul 2023 **Jonas Agency, London**
Full Stack Developer

Delivered client onboarding web experiences for solar energy products, serving as the first digital touchpoint between customers and suppliers.

- Automated the delivery process for new websites by reusing proven experience patterns, helping shorten release cycles.
- Produced lead-capture websites that delivered strong conversion performance for client campaigns.

Jun 2022 – Jul 2023 **Happy Water NFT, France**
Software Developer

Aug 2021 – Jun 2022 **Lavish Trading, London**
Software Developer

Sep 2020 – Jun 2021 **MySchool, Morocco**
Software Developer

2016 – 2020 **Freelance, Morocco**
Web Designer

Education

2023 - 2025 **Master's in Big Data & Cloud Computing**
University of Hassan 2, Casablanca

2020 - 2023 **Bachelor's in Computer Science**
University of Hassan 2, Casablanca

theodo

Software Engineer

Dear Hiring Team,

I am applying for the Software Engineer position at theodo. I build product experiences that turn complex, manual workflows into practical tools, combining engineering, interface design and AI-assisted development, and I would like to bring that focus to your team.

At Hypeo, a MENA creator-marketing SaaS platform, I delivered a contextual AI chat that turns open-ended client conversations into configured marketing campaigns, connected to the internal influencer database. I built and refined the front-end experience in close collaboration with a senior technical lead, adapting the workflows as backend integration and business requirements evolved.

Earlier, at Cyber Cohesion, I led web development of a CTF platform used at events such as OWASP AppSec Days and BSides Singapore, including a Go API service that orchestrated isolated application deployments. At Cogy Tech, I brought 02Book, an AI-powered writing assistant for B2B writers, to production and helped roll out a standardized delivery process across the team.

Thank you for your time and consideration. I would welcome the opportunity to discuss how I could contribute to the work at theodo.

Best regards,

Mohamed Amine Sayagh
