Summary

Software developer building product experiences that simplify complex processes. Combining engineering, visual design, business understanding, and AI-assisted engineering to turn inefficient workflows into practical tools that help teams get more done. Looking to join a software team building products at scale.

Skills

JavaScript (ES6+)	TypeScript	PHP	Python
Vue 3 / Pinia	React / Next.js	Angular	jQuery
HTML / HTML5	CSS / SCSS / SASS	Accessibility (WCAG)	Laravel / Blade
Vite	Git / CI/CD	Docker	Jest / Vitest / Cypress
Figma	Tailwind CSS	UI Design	Prototyping
Claude Code & Codex	MCP Integrations	LLM API Integration	AI Agent Workflows

Experience

Sep 2026 – Present

Technical Consultant, France

Software Developer

- Tarifpublic.fr, provide technical consulting for a French state-supported marketplace for public procurement, supporting standardized product pricing.
- Develop AI agent workflows to automate business decisions for international agency engagements.

Jul 2025 – Sep 2026

Phoenix AI USA Inc. - Hypeo, MENA

Software Developer

Developed product features for Hypeo, a MENA creator-marketing SaaS platform connecting influencers and media creators with businesses launching online content campaigns.

- Delivered a contextual AI chat that transforms open-ended client conversations into configured marketing campaigns, integrated with the internal influencer database.
- Built and refined the front-end experience in Next.js, TypeScript and Tailwind CSS, creating reusable component libraries on Radix UI, in close collaboration with a senior technical lead.
- Automated the manipulation and extraction of influencer data from web-scraping outputs and database pipelines used across the platform.

Experience

- Took ownership of maintenance, deployment support, access/IP handover, and bug-fix coordination during a technical leadership transition.
- Delivered a moderation platform in Vue 3 that let the team review and onboard creator profiles from one place, connected to Hypeo's account API endpoints.
- Developed an external data-metrics solution for creator audience and professional collaboration insights, later accepted and integrated into the company workflow.

Feb 2025 – Jun 2025

Cogy Tech, Morocco

Software Developer

Co-developed and rolled out a standardized software delivery process, aligning team workflows and contributing to lower shipping costs.

- Established a reusable prototyping approach to validate business requirements across multiple use cases before development.
- Tracked sprint KPIs in Odoo and surfaced bottlenecks to improve planning accuracy and throughput.
- Brought 02Book to production, an AI-powered writing assistant for B2B writers, used by clients such as Orange and Le Matin.
- Strengthened software design skills under continuous mentorship, working on client requirements and delivery constraints.

Nov 2024 – Jan 2025

Rich Media, Morocco

Software Developer

Designed and integrated product features for Inflauditor, a business decision-making dashboard that helps brands analyze large-scale creator data for campaign planning.

- Owned UI design, UX flows and prototypes for Inflauditor to validate product direction and accelerate development decisions.
- Integrated data insights such as creator scoring, language detection, and sentiment indicators to support campaign planning.

Aug 2024 – Oct 2024

Digital Consulting

Software Developer

Delivered high-conversion lead-capture landing pages for Miratti (Morocco), French Dandy (Dubai), and Horde Studio (USA), supporting growth campaigns showcased at regional events (e.g., Forbes Middle East).

Aug 2023 – Jul 2024

Cyber Cohesion, Singapore

Software Developer

Led web development of a CTF platform for security competitions, used in global events such as OWASP AppSec Days, BSides Singapore, and ISACA.

- Implemented Go API endpoints to orchestrate isolated application deployments, providing a secure training environment for participants.

Experience

- Provided coaching and mentoring to developers on the platform's web experience.

May 2023 – Jul 2023

Sodiadd, France

Software Developer

Developed a responsive, accessible subscription website in HTML, CSS and JavaScript for individual real estate investment plans.

Oct 2022 – Apr 2023

Jonas Agency, London

Full Stack Developer

- Automated the delivery process for new websites by reusing proven experience patterns, helping shorten release cycles.
- Produced lead-capture websites that delivered strong conversion performance for client campaigns.

Jul 2022 – Sep 2022

Happy Water NFT, France

Software Developer

Aug 2021 – Jun 2022

Lavish Trading, London

Software Developer

Jan 2021 – Jun 2021

MySchool, Morocco

Software Developer

2016 – 2020

Freelance, Morocco

Web Designer

Y Strategie

Senior Front-End Developer

Dear Hiring Team,

I am applying for the Senior Front-End Developer position at Y Strategie. I build product experiences that turn complex, manual workflows into practical tools, combining engineering, interface design and AI-assisted development, and I would like to bring that focus to your team.

At Hypeo, a MENA creator-marketing SaaS platform, I delivered a contextual AI chat that turns open-ended client conversations into configured marketing campaigns, connected to the internal influencer database. I built and refined the front-end experience in close collaboration with a senior technical lead, adapting the workflows as backend integration and business requirements evolved.

Earlier, at Cyber Cohesion, I led web development of a CTF platform used at events such as OWASP AppSec Days and BSides Singapore, including a Go API service that orchestrated isolated application deployments. At Cogy Tech, I brought 02Book, an AI-powered writing assistant for B2B writers, to production and helped roll out a standardized delivery process across the team.

Thank you for your time and consideration. I would welcome the opportunity to discuss how I could contribute to the work at Y Strategie.

Best regards,

Mohamed Amine Sayagh
