Claude / Codex	Obsidian	Hermes	Harness Eng

Experience

Jul 2026 – Present

LingoWP

Launched a WordPress multilingual platform that translates content directly from its original sources through a structured extraction pipeline. Delivered to four agency clients before launching commercially.

Jul 2025 – Present

Phoenix AI USA Inc. - Hypeo, MENA

Software Developer

Contributed to Hypeo, a MENA creator-marketing SaaS platform connecting influencers and media creators with businesses launching online content campaigns.

- Integrated an AI agent experience that transforms open-ended client conversations into configured marketing campaigns, connected to the internal influencer database.
- Built and refined the front-end experience in close collaboration with a senior technical lead, continuously adapting workflows to backend integration and evolving business requirements.
- Supported data operations by automating manipulation and extraction of influencer data from web-scraping outputs and database-oriented pipelines used across the platform.
- Took ownership of maintenance, deployment support, access/IP handover, and bug-fix coordination during a technical leadership transition.

Experience

- Documented core business modules, missing implementation areas, and architectural solutions to support future development planning.
- Developed an external data-metrics solution for creator audience and professional collaboration insights, later accepted and integrated into the company workflow.

Nov 2024 – Jun 2025

Cogy Tech, Morocco

Software Developer

Helped define and roll out standardized software delivery process, aligning team workflows and contributing to lower shipping costs.

- Established a reusable prototyping approach to validate business requirements across multiple use cases before development.
- Tracked sprint KPIs in Odoo and surfaced bottlenecks to improve planning accuracy and throughput.
- Brought 02Book to production, an AI-powered writing assistant for B2B writers, used by clients such as Orange and Le Matin.
- Strengthened software design skills under continuous mentorship, working on client requirements and delivery constraints.

Nov 2024 – Jan 2025

Rich Media, Morocco

Software Developer

Contributed to Inflauditor, a business decision-making dashboard that helps brands analyze large-scale creator data to support campaign planning.

- Designed UI flows and prototypes for Inflauditor to validate product direction and accelerate development decisions.
- Integrated data insights such as creator scoring, language detection, and sentiment indicators to support campaign planning.

Jun 2024 – Oct 2024

Digital Consulting

Software Developer

Delivered high-conversion lead-capture landing pages for Miratti (Morocco), French Dandy (Dubai), and Horde Studio (USA), supporting growth campaigns showcased at regional events (e.g., Forbes Middle East).

Apr 2023 – Jul 2024

Cyber Cohesion, Singapore

Software Developer

Led web development of a CTF platform for security competitions, used in global events such as OWASP AppSec Days, BSides Singapore, and ISACA.

- Implemented a Go API service to orchestrate isolated application deployments, providing a secure training environment for participants.
- Developed the web experience of Warzone, a dashboard to track team progress, scoring and overall competition gamification.

Experience

Jun 2022 – Jul 2023

Jonas Agency, London

Full Stack Developer

Delivered client onboarding web experiences for solar energy products, serving as the first digital touchpoint between customers and suppliers.

- Automated the delivery process for new websites by reusing proven experience patterns, helping shorten release cycles.
- Produced lead-capture websites that delivered strong conversion performance for client campaigns.

Apr 2023 – Jul 2024

Sodiadd, France

Developed a responsive subscription website for individual real estate investment plans.

Jun 2022 – Jul 2023

Happy Water NFT, France

Built a rich Web3 NFT experience focused on digital asset presentation and user engagement.

Aug 2021

Lavish Trading, London

Developed a subscription website for a London-based trading investment company.

Sep 2020 – Jun 2021

MySchool, Morocco

Built an online course platform for school education during the COVID period.

Education

2023 - 2025

Master's in Big Data & Cloud Computing

University of Hassan 2, Casablanca

2020 - 2023

Bachelor's in Computer Science

University of Hassan 2, Casablanca

Languages

Arabic - Native

French - Professional

English - Professional

FICTIONAL

Full Stack Software Developer, Workflow Products

Dear Hiring Team,

I am applying for the Full Stack Software Developer, Workflow Products role at FICTIONAL. My work has focused on building software that helps people carry out complex tasks, from campaign setup to security competitions.

At Hypeo, I integrated an AI agent experience that turns client conversations into configured marketing campaigns using an internal influencer database. Working closely with a senior technical lead, I refined the front-end experience as the backend integration and business requirements evolved.

At Cyber Cohesion, I led web development for a security competition platform used at events including OWASP AppSec Days and BSides Singapore. I also developed its Warzone dashboard, which tracks team progress and scores.

I would welcome the opportunity to discuss how my experience could support the work at FICTIONAL. Thank you for your consideration.

Best regards,

Mohamed Amine Sayagh
