Summary

Software developer building product experiences that simplify complex processes. Combining software engineering, visual design, business understanding, and AI-assisted engineering to turn inefficient workflows into practical tools that help teams get more done. Looking to join a software team building products at scale.

Skills

JavaScript	Java	Python	PHP
React / Next.js	Angular	Node.js / NestJS	Spring Boot
FastAPI	WordPress	SDKs	PostgreSQL
Data scraping	CI/CD	Docker	Testing Practices
Figma	System design	Interactive design	Prototyping
Claude Code & Codex	RAG	LLM API Integration	AI Agent Workflows

Experience

Sep 2026 – Present

Technical Consultant, France

Software Developer

- Tarifpublic.fr, provide technical consulting for a French state-supported marketplace for public procurement, supporting standardized product pricing.
- Develop AI agent workflows to automate business decisions for international agency engagements.

Jul 2025 – Sep 2026

Phoenix AI USA Inc. - Hypeo, MENA

Software Developer

Developed product features for Hypeo, a MENA creator-marketing SaaS platform connecting influencers and media creators with businesses launching online content campaigns.

- Integrated an AI agent experience built on Large Language Models that transforms open-ended client conversations into configured marketing campaigns, connected to the internal influencer database.
- Built and refined the front-end experience in close collaboration and code review with a senior technical lead, continuously adapting workflows to backend integration and evolving business requirements.

Experience

- Took ownership of production-grade software maintenance, CI/CD deployment support on cloud services, access/IP handover, debugging and bug-fix coordination during a technical leadership transition.
- Documented core business modules, missing implementation areas, and software architecture solutions to support future engineering planning.

Feb 2025 – Jun 2025

Cogy Tech, Morocco

Software Developer

Co-developed engineering standards for code quality and shipping, delivering standardized software to enterprise customers at lower cost.

- Established a reusable prototyping approach to validate business requirements across multiple use cases before development.
- Tracked sprint KPIs in Odoo and surfaced bottlenecks to improve planning accuracy and throughput.
- Brought 02Book to production, an AI-enabled writing assistant for B2B writers, used by clients such as Orange and Le Matin.
- Strengthened software design skills under continuous mentorship, working on client requirements and delivery constraints.

Aug 2024 – Jan 2025

Rich Media, Morocco

Software Developer

Designed and integrated product features for Inflauditor, a business decision-making dashboard that helps brands analyze large-scale creator data for campaign planning.

- Designed UI flows and prototypes for Inflauditor to validate product direction and accelerate development decisions.
- Integrated data insights such as creator scoring, language detection, and sentiment indicators to support campaign planning.
- Delivered high-conversion lead-capture landing pages for Miratti (Morocco), French Dandy (Dubai), and Horde Studio (USA), supporting growth campaigns showcased at regional events (e.g., Forbes Middle East).

Aug 2023 – Jul 2024

Cyber Cohesion, Singapore

Software Developer

Led web development of a CTF platform for security competitions, used in global events such as OWASP AppSec Days, BSides Singapore, and ISACA.

- Implemented a Go API service to orchestrate isolated application deployments, providing a secure training environment for participants.
- Provided coaching and mentoring to developers on the platform's web experience.

Experience

May 2023 – Jul 2023

Sodiadd, France

Software Developer

Developed a responsive subscription website for individual real estate investment plans.

Oct 2022 – Apr 2023

Jonas Agency, London

Full Stack Developer

- Automated the delivery process for new websites by reusing proven experience patterns, helping shorten release cycles.
- Produced lead-capture websites that delivered strong conversion performance for client campaigns.

Jul 2022 – Sep 2022

Happy Water NFT, France

Software Developer

Aug 2021 – Jun 2022

Lavish Trading, London

Software Developer

Jan 2021 – Jun 2021

MySchool, Morocco

Software Developer

2016 – 2020

Freelance, Morocco

Web Designer

Oracle

Senior AI Software Engineer

Dear Hiring Team,

I am applying for the Senior AI Software Engineer role at Oracle. My work has focused on building software that helps people carry out complex tasks, from campaign setup to security competitions.

At Hypeo, I integrated an AI agent experience that turns client conversations into configured marketing campaigns using an internal influencer database. Working closely with a senior technical lead, I refined the front-end experience as the backend integration and business requirements evolved.

At Cyber Cohesion, I led web development for a security competition platform used at events including OWASP AppSec Days and BSides Singapore. I also developed its Warzone dashboard, which tracks team progress and scores.

I would welcome the opportunity to discuss how my experience could support the work at Oracle. Thank you for your consideration.

Best regards,

Mohamed Amine Sayagh
