Oracle

Software Development Manager

Dear Hiring Team,

I am applying for the Software Development Manager role at Oracle. My work has focused on building software that helps people carry out complex tasks, from campaign setup to security competitions.

At Hypeo, I integrated an AI agent experience that turns client conversations into configured marketing campaigns using an internal influencer database. Working closely with a senior technical lead, I refined the front-end experience as the backend integration and business requirements evolved.

At Cyber Cohesion, I led web development for a security competition platform used at events including OWASP AppSec Days and BSides Singapore. I also developed its Warzone dashboard, which tracks team progress and scores.

I would welcome the opportunity to discuss how my experience could support the work at Oracle. Thank you for your consideration.

Best regards,

Mohamed Amine Sayagh
