Y Strategie

Senior Front-End Developer

Dear Hiring Team,

I am applying for the Senior Front-End Developer role at Y Strategie. My work has focused on building software that helps people carry out complex tasks, from campaign setup to security competitions.

At Hypeo, I integrated an AI agent experience that turns client conversations into configured marketing campaigns using an internal influencer database. Working closely with a senior technical lead, I refined the front-end experience as the backend integration and business requirements evolved.

At Cyber Cohesion, I led web development for a security competition platform used at events including OWASP AppSec Days and BSides Singapore. I also developed its Warzone dashboard, which tracks team progress and scores.

I would welcome the opportunity to discuss how my experience could support the work at Y Strategie. Thank you for your consideration.

Best regards,

Mohamed Amine Sayagh
